

## Putting “call numbers” into the right order **ACTIVITY**

Print off and laminate the following 6x pages representing the spine label of books using the “Library of Congress” call number system.

Give these out to 6x students in your class, and have them come up to the front of the class and get themselves into physical order (as if they were books on the shelf).

Check with the class – do they have it right, or need to make changes?

Can use this activity in conjunction with resource:

**#T57** Finding Library Books on the Shelf PPT, found in the *HCT Student Research* website.
